SALOME NJOKI KUNGU

Professional summary

An aspiring Data Analytics professional possessing a sturdy base in data processing, reporting, and operational support developed over more than three years in administrative, financial, and technical settings. Having the experience of working with datasets, forming reports, and improving precision by means of proficient application of Excel, Google Sheets, SQL, Python basics, data visualization software like Power BI and Tableau and other tools for increasing productivity. Wanting to utilize the increasing technical skills, problem-solving capacity, and strong documentation support to assist the data collection, analysis, dashboard development in a vibrant analytics team and devoted to learning always.

Project

RAG-Based Question Answering System ***Cyber Shujaa Data & AI Program***

- Built a Retrieval-Augmented Generation (RAG) system to enable question answering over PDF documents.
- Preprocessed and chunked document text using PyPDF for efficient retrieval.
- Generated text embeddings using Sentence Transformers and stored them in a FAISS vector database for semantic search.
- Integrated a Hugging Face FLAN-T5 model to generate context-aware responses from retrieved document chunks.
- Combined information retrieval and generative AI to produce grounded, document-based answers.

Tech Stack: Python, LangChain, FAISS, Hugging Face Transformers, PyPDF

Project Link:

<https://github.com/KijoSal-dev/Retrieval-Augmented-Generation-RAG-System-for-Question-Answering>

Core competencies

- **Data Analysis & Preparation:** Data cleaning, transformation, and exploratory analysis using Python (Pandas) and spreadsheets to identify patterns and trends.
- **Programming & Data Tools:** Python (fundamentals), SQL (introductory), and Excel/Google Sheets (functions, pivot tables, data lookup).
- **Machine Learning Exposure:** Basic understanding of regression and classification models

with introductory experience in applying and evaluating models in coursework.

- **Data Visualization & BI Tools:** Tableau and Power BI for building dashboards, reporting, and visual communication of insights.
 - **Reporting & Communication:** Presenting data insights through structured reports and dashboards for technical and non-technical audiences.
 - **Collaboration & Learning:** Strong teamwork skills with ability to adapt quickly and learn new data tools and techniques.
-

Professional Experience

Data and AI Engineering Fellowship

Tech4Dev, Remote | Aug 2025 – Present (Expected graduation: July 2026)

- Accurately enter, clean, and maintain structured datasets, ensuring high levels of data integrity, consistency, and completeness.
- Perform data validation and quality checks to identify and correct errors, duplicates, and inconsistencies in datasets.
- Develop clear and well-structured reports and summaries to support project decision-making and reporting needs.
- Support the development of UmojaAgri, a web application for real-time tracking of agricultural produce, by preparing and managing clean, usable datasets.
- Collaborate with a multidisciplinary team of data scientists and developers to ensure smooth data flow between systems and applications.
- Apply strong attention to detail and organizational skills to manage large datasets under deadlines in a remote work environment.

Data and AI Fellow

Cyber Shujaa, Remote | Jan 2026 – April 2026 (Expected graduation: April 2026)

- Built and evaluated regression and classification models for predictive tasks as part of machine learning training.
- Performed web scraping and data cleaning using Python (Pandas) on structured datasets (e.g., Netflix, Titanic).
- Designed an interactive HR dashboard in Tableau to analyze employee demographics, hiring trends, and salary distribution with dynamic filters.
- Applied data analysis techniques to identify patterns in workforce composition and departmental distribution.
- Deployed machine learning applications using Streamlit.

Finance and Administration Associate

Technisem / Novalliance (Savana seeds), Kenya | Dec 2022 – Feb 2025

- Collected, cleaned, and analyzed operational and financial datasets to support evidence-based reporting and decision-making.
- Prepared clear weekly and monthly analytical reports and summaries, translating data findings into concise insights for stakeholders.

- Conducted basic trend and variance analysis (budget vs. actuals, expense patterns) to support project planning and cost control.
- Supported audits and compliance reviews by preparing accurate datasets, reconciliations, and supporting documentation.
- Collaborated cross-functionally with finance, HR, and operations teams to gather data requirements and validate analytical outputs.
- Used Excel and reporting tools to organize datasets, track metrics, and support research and project implementation activities.

Education

- BSc. Business Information Technology – Kiriri Women’s University of Science & Technology

Certifications

- Associate Data Analyst - DataCamp
- Data Analysis - UNICEF
- Data Literacy - DataCamp
- AI for Developers - ALX
- AI Software Engineering - Power Learn Project Africa
